- NEMA 1 and 3R
- 14 Gauge Steel
- Powder Coated
- Available MCCB Mounting Hardware

HARDWARE RESOURCE COMPANY

Hardware Resource Company has been manufacturing mounting hardware kits for molded case circuit breakers since 1977. Our first customers were switchgear builders, electrical distributors, and electrical contractors. All of our clients needed hardware that was either unavailable from the original manufacturer or was prohibitively expensive. HRC filled this gap with manufacturing experience, flexibility of design, and reasonable cost.

Do you need a custom mounting solution? Our engineering and fabrication teams can help. Call or email us to find out more.

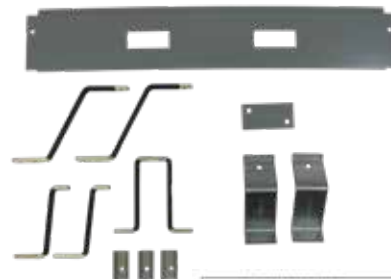

MCCB Mounting Kits

HRC molded case circuit breaker mounting kits are available for a wide variety of major makes and models of circuit breakers and panelboards: Cutler-Hammer/Westinghouse, Federal Pacific, General Electric, and ITE/Siemens.

Panel Switch Mounting Kits

HRC produces a line of panel switch mounting kits for various Cutler-Hammer/Westinghouse, and General Electric panel switches.

All Mounting Kits Include:

- Insulated A, B and C Phase Branch Bus for Breaker or Switch
- Breaker or Switch Mounting Brackets
- Insulating Hardware
- Cover Plates (If Applicable)
- All Necessary Screws, Bolts, and Washers
- Printed Mounting Instructions

Blank Filler Plates

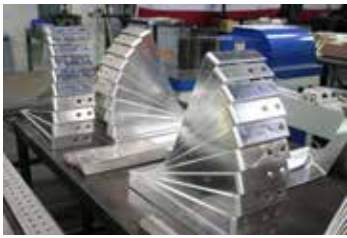

HRC makes it easy to finish your panel board with blank filler plates to cover the empty spaces.

Do you need help selecting the right product for your particular application? Our dedicated sales, engineering, and fabrication staff are ready to help you.

Made In The USA

All HRC products are made in the USA at our factory in Commerce, California. Every kit is put through a rigorous testing schedule by the experts in our QA department.

EZCan NEMA 3R Enclosures

508A

EZCan Electrical Enclosures

Designed to be multifunctional, HRC brand EZCan enclosures provide versatile housing for your electrical and electronic equipment--telemetry, controls, etc. These enclosures are durable and easy to configure to your specific needs. All EZCan enclosures are UL listed and carry a UL 508A label. All EZCan enclosures are available NEMA 1 or NEMA 3R rated. All EZCan enclosures are available freestanding or wall-mount.

EZCan MCCB Hardware

EZCan 600 Amp NEMA 3R Enclosure

Optional EZCan mounting kits give you the flexibility to mount a variety of MCCB makes and models in your EZCan enclosure. Kits are available for most major electrical OEM circuit breakers up to 1200 Amps. Each kit is a complete mounting solution and includes a front panel with cutouts for the particular kit's MCCB.

EZCan enclosures are perfect as control cabinets. When purchased as stand-alone enclosures (without an optional MCCB mounting kit), EZCan enclosures come standard with a blank cover plate that can be easily customized to your particular designs.
